Professional Summary

Highly motivated Information Science and Engineering student with strong academic performance and hands-on experience in web development, AI-powered applications, and frontend design. Skilled in building responsive and user-centric applications using React, Flask, Python and JavaScript. Passionate about solving real-world problems through innovative software solutions and continuously learning emerging technologies.

Education

Jawaharlal Nehru New College of Engineering (JNNCE)

2024 – 2028

B.E in Information Science and Engineering

Shimoga, India

- Current Year: Third Year
CGPA (1st, 2nd, 3rd & 4th Semester): **9.3**
- 10th Percentage: **97%**
- PUC Percentage: **96%**

Achievements & Activities

- Member of technical club – **Byte Brigade**
- Selected member of the **ISTE (Indian Society for Technical Education)** student chapter from JNNCE.
- Participated in hackathons, coding competitions, technical events, and project presentations.
- Consistent academic excellence throughout school and engineering education.

Projects

1. Cybersecurity Threat Detection System

A Cybersecurity Threat Detection System is a security-focused application designed to monitor and detect suspicious activities, unauthorized access, and potential cyber threats in real time. The system analyzes user behavior, login attempts, and network activities to identify anomalies and generate alerts before attacks can cause damage.

2. StadiumSync AI – Accessible FIFA World Cup Fan Platform

Developed a mobile-first, accessibility-focused fan experience platform for FIFA World Cup 2026 stadiums. Built multilingual AI assistance, accessible navigation, stadium information, amenity locator, crowd-density visualization, and emergency reporting using Next.js, TypeScript, and Google Gemini. Ranked 346 globally in the Google Build with AI PromptWars Virtual Challenge and earned 500 credits.

3. Library Management System

Built a Java Swing desktop application with SQLite for managing library operations. Implemented Admin/Student login, book search, issue tracking, due-date and fine calculation, overdue monitoring, dashboard statistics, and database-driven book records.

4. Sorting Algorithm Visualizers

Built interactive visualizers for Merge Sort, Bubble Sort, and Insertion Sort using HTML, CSS, and JavaScript. Designed real-time animations to explain sorting concepts and divide-and-conquer techniques.

5. NeuroLearn – Adaptive Learning Platform

Developed a neuro-adaptive learning platform for Dyslexia and ADHD learners with adaptive UI modes, focus mode, and personalized reading support. Implemented PDF text extraction and accessibility-focused features using Flask, Python and JavaScript.

6. Professional Portfolio Website

Designed and deployed a responsive portfolio website showcasing technical projects, skills, and achievements with modern UI/UX principles.

Technical Skills

Programming Languages: Python, Java, C, JavaScript

Frontend: HTML5, CSS3, JavaScript, React.js

Backend & Frameworks: Flask

Database: MySQL, SQLite

Tools & Platforms: Git, GitHub, Netlify, VS Code

Core Subjects: DBMS, Operating Systems, Computer Networks, Data Structures
